

Healthy and Hygienic Production

Why
YE-GEÇ ? 
Dr. PISHER

Parkaya Gıda Sanayi ve Ticaret Anonim Şirketi has taken off to produce healthy products in extremely hygienic environments and under the supervision of food engineers by using innovative and own technologies in order to bring traditional excellent tastes together with the consumers.

One of the foundation reasons of Parkaya Gıda is to ensure that its 60 years of excellent Turkish tastes are presented to the consumers at four corners of the world in its own packages by its own packaging technology without using any chemical preservers. The fresh products which are packaged and stored by applying completely natural methods maintain their freshness, exquisiteness, palatal delight and taste until their expiration dates by means of the healthy and nature friendly package which is only opened by the final consumers.

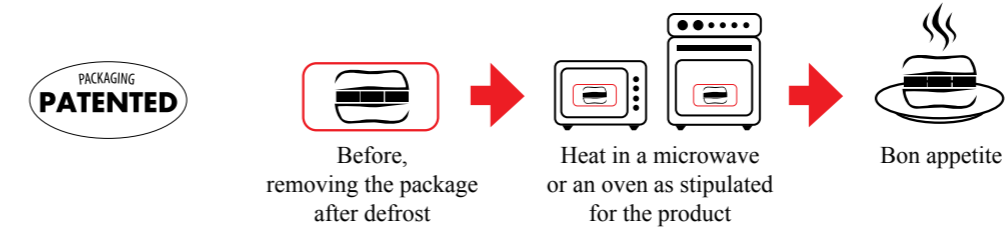

The information, experience, skills and technology in order to create these excellent products maintain their superior characteristics at production until the final consumption moment without losing any of them place Parkaya Gıda in a different position in the sector.

The palatal delight and presentation of the sauced products have brought a new perspective to the sector. The tastes which can be presented by the product, bread and appropriate sauce or sauces in a single package and carried by the package which can be only opened by the consumer shall take their indispensable place in the life of the consumers.

The healthy products without any additives presented in nature friendly packages which can preserve their tastes for a long time will become a type of presentation indispensable not only for the Turkish cuisine and taste but also for the all cuisines and tastes of the world because these products have the technology which can be applied on any cuisines of the world.

The indispensable and most important vision of our company is to do what is necessary for healthy people and nature and apply and develop the most careful and healthy practices in order to achieve that vision. Our current production method is the biggest assurance of what we have done. We have been gone to town on for being a leader on that issue.

Especially, presenting the food to the final consumers from any age and class who have to consume food out of their homes in a form which is healthy as the time of production and which is presented to the consumers without any touch from anyone else are some of our biggest differences in the sector.

For the frozen goods, we have food presentation methods as Defrost-Heat-Eat or only Defrost-Eat up to a year after production and we have also the products presented at +2 degrees Celsius which can be preserved maximum for three weeks and consumed by heating or cold.

The products which are produced in rich varieties for satisfying the food needs of consumers at any time of the day, practically, tastefully and fast are produced in accordance with the Declaration for Quick Frozen Foodstuff of the Turkish Food Codex.
Manufacturer firm registration no: TR-07-K-008057

For safe and healthy generations..

Why
YE-GEÇ ? 
Dr. PISHER

Nature-Friendly Package

Due to several valid reasons, the consumers of today's world mostly prefer the packages featuring sensitivity on nature and environment. By means of technological developments, the new-generation and recyclable packages which are nature-friendly, manufactured from renewable sources and provide high-performance at various temperatures are used by Parkaya Gıda.

- Suitable for Modified Atmospheric Packaging (MAP) System
- Suitable -40°C shock freezer
- Suitable for maintaining in a deep freezer at -18°C
- Suitable for cold storage at +2°C
- Suitable for microwaves and heating by an oven up to 190°C
- Manufactured from recyclable, renewable sources, dissolves in nature
- Ideal package for all foodstuff
- Single package from production to final consumption

Consumption fields of our products

- Canteens and dormitories of primary schools, high-schools and universities
- Garrisons, military schools, military canteens, social facilities and camping areas, hospital canteens and canteens of public institutions,
- Buses, trains, boats, planes and the transportation sector where any kinds of offers and sales are made
- Gas stations, bus stations, train stations, jetties, airfields and any points where sales are made for 7/24
- Open and closed stadiums, open-air concerts, meetings, organizations where fast-food is sold
- Meetings of political parties, openings with offerings
- The daily provision needs of working personnel or workplace provision needed for overtime
- Market chains, vending machines, modern mobile counters, beaches, coastlines, ceremonies and any places visited by tourists
- Any employer who wants to own a menu with rich varieties which are tasteful, healthy, countable, standard, ready for service 7/24 and without any cook or chef in the kitchen and without any waste.
